# Thank You [A, 108 bpm]

**Dan Wakefield** Copyright

**Verse**

```
F#m                        E   F#m              E
  You could have stayed home   and left us alone
F#m           E           D
  To do this life on our own
F#m               E   F#m                    E
  You had every right   to say Your good-byes
F#m             E               F#m          D
  To turn Your back, leave us here in the night
        D                E       D               E
But Your love for us is strong, strong like the grave
```

---

**Chorus**

```
A
Thank You for coming down here
C#
Thank You for coming down here
  D              Dm               A
What else can I say? Hallelujah!
```

---

**Bridge**

```
               D                    E                      F#m
How beautiful is Your love for me, it's deeper than canyons in the sea
             D                       E            F#m
This mystery of Your concern for a worm like me
               D                    E                      F#m               E
How beautiful is Your love for me, it's deeper than canyons in the sea
             D                       E
This mystery of Your concern for a worm like me
```
